# **About Lockwood Guns â?? Craftsmanship Meets Precision**

Lockwood Guns is more than just a firearms manufacturer; we are a testament to the marriage of traditional craftsmanship and modern precision.

# Unmatched Material Quality 111

At Lockwood Guns, our commitment to quality is non-negotiable. We believe that a firearm is not just a tool; itâ??s a legacy. This belief is deeply embedded in our choice of materials. We use 4140-grade steel for our barrels, a material renowned for its outstanding strength and resilience. This type of steel ensures that our barrels can withstand high pressures, providing consistent performance and exceptional longevity.

Moving on to the body of our firearms, we employ 7075 T6 grade aluminum. This aerospace-grade aluminum is known for its lightweight properties coupled with superior strength, making our guns not only durable but also comfortable for extended use. The choice of 7075 T6 aluminum allows us to craft firearms that balance robustness with ease of handling â?? a crucial factor for both enthusiasts and professionals.

# **Elegance in Wood and Plastic**

Elegance and comfort in handling are pivotal in our design philosophy. To achieve this, we incorporate quality walnut wood in our firearms. Walnut not only brings a classic aesthetic appeal but also offers durability and a natural grip. Each piece of walnut wood is carefully selected and treated to enhance its natural patterns, ensuring that every Lockwood Gun stands out as a piece of art.

For those who prefer a more contemporary look and feel, we offer options with high-quality plastic components. These plastics are selected for their durability, resistance to environmental factors, and lightweight properties. Our plastic components provide a modern touch while maintaining the ergonomic design and reliability that Lockwood Guns is known for.

#### **Commitment to Excellence**

Every Lockwood Gun is a result of meticulous design, expert engineering, and precise manufacturing. We stand by the quality of our products, ensuring that each firearm not only meets but exceeds the

expectations of our discerning customers. Whether you are a collector, a sportsman, or a professional, Lockwood Guns promises a firearm that combines performance, reliability, and aesthetic appeal.

Thank you for choosing Lockwood Guns â?? where every shot is a testament to quality and precision.[/vc\_column\_text][vc\_empty\_space hide\_on\_desktop=â?•â?• hide\_on\_notebook=â?•â?• hide\_on\_tablet=â?•â?• hide\_on\_mobile=â?•â?•][vc\_single\_image image=â?•5749â?³ img\_size=â?• mediumâ?• alignment=â?•centerâ?•][vc\_column\_text]

# PRODUCTS SHOWCASE

Lockwood Guns presents a diverse and impressive range of firearms, each designed to cater to the specific needs of shooting enthusiasts. Our product line is a testament to our commitment to quality and functionality.

The Vanguard of Versatility: US101 Series

Our US101 series, available in striking finishes like Black, White, Bronze, Tiger Print, and the patriotic Flag design, sets a standard in versatility. These 12 Ga shotguns feature a synthetic stock and a choice of barrel lengths (47-61-66-71-76cm), catering to various shooting styles. The magazine options (2+1, 4+1, 9+1) combined with a multi choke and a weight of 3700 gr make these gas-semi-auto shotguns a favorite among hunters and sports shooters alike.

Innovation Meets Tradition: US102 & US107

The US102 series, with its distinctive Black, Brown, and White options, and the aluminum lower receiver, stands out for its innovative design. Meanwhile, the US107 series, available in White Aluminum and White Steel, as well as engraved versions, represents the classic over & under shotgun. Calibers range from 12-20-.410 Ga, featuring walnut stock and an optional ejector, ensures a blend of tradition and modern engineering.

The Ultimate in Side-by-Side and Semi-Automatics: US108 & US109

Our US108 offers a timeless side-by-side experience with its walnut stock and multi-fix choke system, while the US109 series brings semi-automatic excellence in models 1 to 9. These models vary in features but consistently provide a walnut stock, 12-20 Ga caliber, and a 4+1 capacity.

**Pump Action Perfection: US116 & US117** 

The US116 and US117 models are unmatched for those who favor pump action. With caliber 12 Ga, walnut stock, and capacities of 4+1 and 7+1, these shotguns are designed for reliability and performance.

# A New Era in Lever Action: Unique US Models

Weâ??ve also redefined the lever-action experience. Our unique models like the US112 in Odd Green and Camouflage, and others with replaceable barrel sets, bring a new level of adaptability to the lever-action genre.

#### **Special Editions and Customization**

Lockwood Guns honors various constituencies with our special editions and allows for personalization through our customization program. Whether itâ??s for dedicated servicemen, first responders, or commemorating a corporate milestone, our firearms can be tailored to suit.
